

According to organizer Luke Heine, the skills these high school students are acquiring could put them on the path to a lucrative career. 

“There’s a lot of money in tech, and it’s not uncommon for an engineer at Facebook to be to be easily making half a million dollars a year conservatively,” said Luke Heine, an organizer for the Northland Hackathon.

Heine said the free event was held virtually due in part to COVID-19 concerns and to allow students from across the state to take part.

Below links to some of the projects students created during the Northland Hackathon.
